Inpatient Visitor Policy

The following policy is now in effect for inpatient units at this Northwestern Medicine facility from 10 am to 7 pm:

Two visitors at a time are allowed for patients not being treated for COVID-19.

Visitors must check in at the front desk, be screened and wear a badge indicating that they have been screened.

Visitors must be masked at all times, including in the patient’s room.

All visitors must be 18 or older.

Outside of visiting hours, visitors are not allowed except in the following cases:

- Patients under the age of 18 may have one visitor/companion.
- Patients in need of compassionate care, including pastoral care visits and those at the end of life, may have two visitors.
- Patients with disabilities who require a reasonable accommodation for assistance may have one support person.

Outpatient visitor restrictions remain in effect.
